

# Environmental Management Consultancy Services Ltd

*"The provision of environmental support to achieve regulatory compliance, risk and reputation management, and cost savings"*

*Baku, Azerbaijan, 2005*

## Who we are

**EMCS Ltd** is an independent environmental management consultancy company. Nick Schad set up the company in September 1998 in order to pursue contracts of interest and relevance mainly to the oil and gas industry worldwide.

We are based in Morningside, Edinburgh. Our facilities at this site comprise the consultancy office, with offsite storage available in Leith, Edinburgh.

EMCS currently employs 2 staff in Edinburgh. The principal consultant, Nick Schad, operates primarily as environmental scientist / marine biologist / environmental manager and planner. Wendy McMurdo, the other company Director, is responsible for quality assurance / control and company administration; she is also an internationally acclaimed artist.

We have been involved with environmental issues since 1982 at which time Nick began studying for his honours degree in Marine Biology (Heriot-Watt University) following this with an MSc in Marine Resource Development & Protection in 1990 (Institute of Offshore Engineering). He joined Agip UK Ltd in London as their Safety & Environmental Advisor in 1991, and in 1996 joined ERT Ltd in Edinburgh as a consultant specialising in the field of industrial environmental management with particular reference to the oil and gas industry. In 1998 he set up his own consultancy, EMCS Ltd. This long experience means Nick is recognised for his skills and competence in industrial and environmental consultancy circles by regulators, peers and industry specialists alike.

## What we do

**EMCS Ltd** provides a wide range of independent environmental management consultancy services.

With nearly 25 years experience of environmental issues and familiarity with the regulatory processes across a number of industry sectors, we are able to provide services which include environmental management systems (EMS) development, implementation and maintenance, environmental impact assessments, audits and reviews, waste management, training, and generally meeting the environmental management requirements of companies' day-to-day activities.

Our extensive exposure to HSE and QA at the corporate, project and shop-floor levels, combined with our working knowledge of the regulatory authorities ensure that the consultancy service we provide is especially effective in delivering the requisite level of environmental management.

Our consultancy services expertise covers principally the UK but extends in addition to Vietnam, Azerbaijan and Denmark.

Most of the work in recent years has focussed on EMS development and maintenance, bringing a number of companies to successful certification eg to ISO14001 where this is required.

Mekong Delta, Viet Nam, 1997

**EMCS Ltd** staff have been serving the oil and gas industry directly since 1991. In that time we have established a strong and long lasting working relationship with many companies and clients.

A number of these are listed below and you will see that we have worked with a broad range of organisations, as members of staff and when providing provide environmental management consultancy services as required.
